

LOV.

*Furniture
you can depend on*

Metal is an extremely durable and practical material. Due to its numerous advantages, its use in the furniture industry is extremely wide; from social and workshop furniture to systems for offices and apartments. The LOV furniture collection, whose main concern is universality, accommodates these conditions. We present a system that works perfectly in various types of spaces, each time giving a distinctive character to an interior. It consists of wardrobes, cabinets, desks (adjustable and with removable extensions) and a coffee table. LOV is essentially a pragmatic functionality enclosed in a classic, industrial form.

/2

Apart from universality, the main assumption in the designing process was the desire to create minimalistic forms, while maintaining proportional lightness and elegance in the modern version.

I hope that the continuation of the story of LOV will be added by satisfied users...

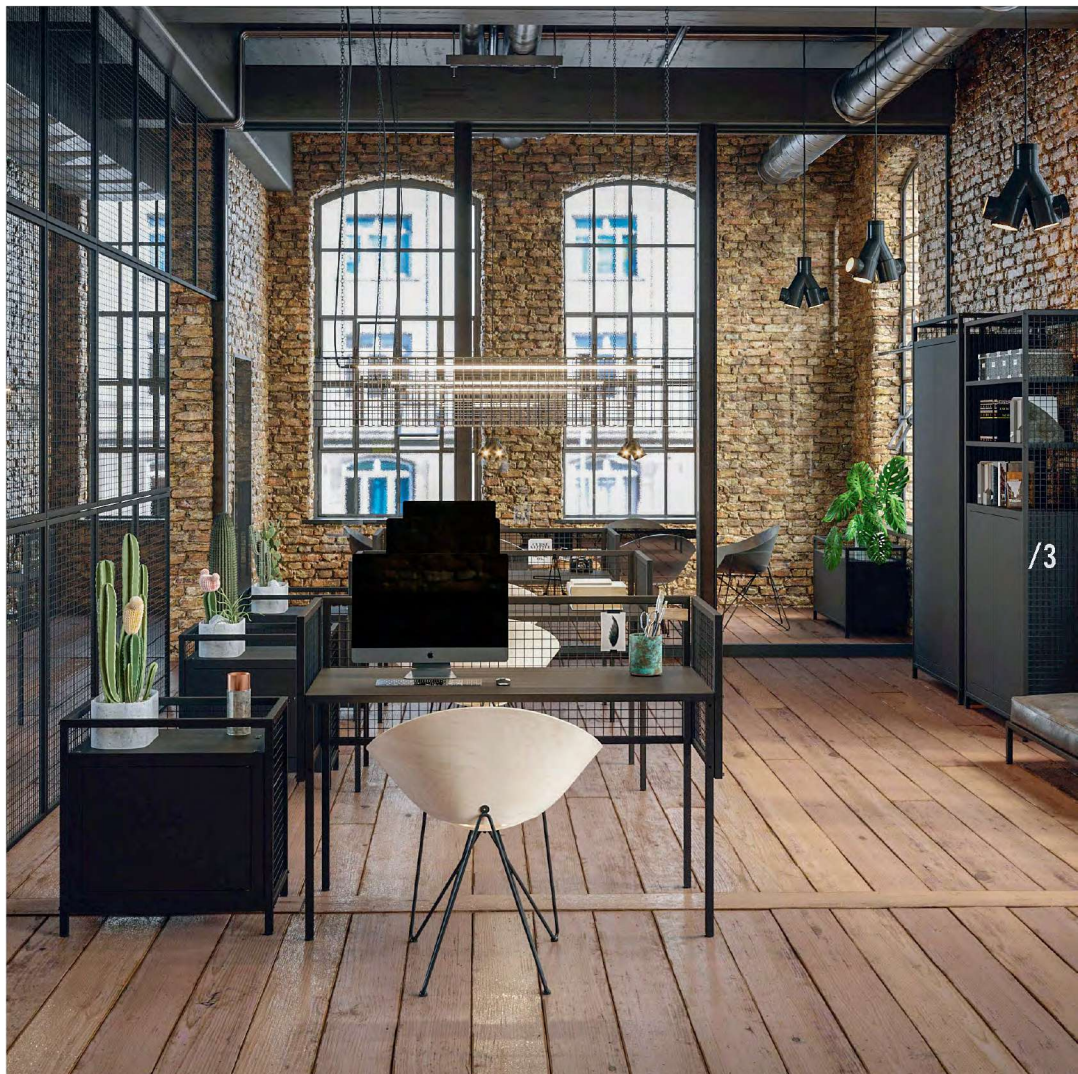

Aleksandra Jakuć – designer

furniture, interior design, catalogue design: Aleksandra Jakuć

visualizations: Wojciech Janicki

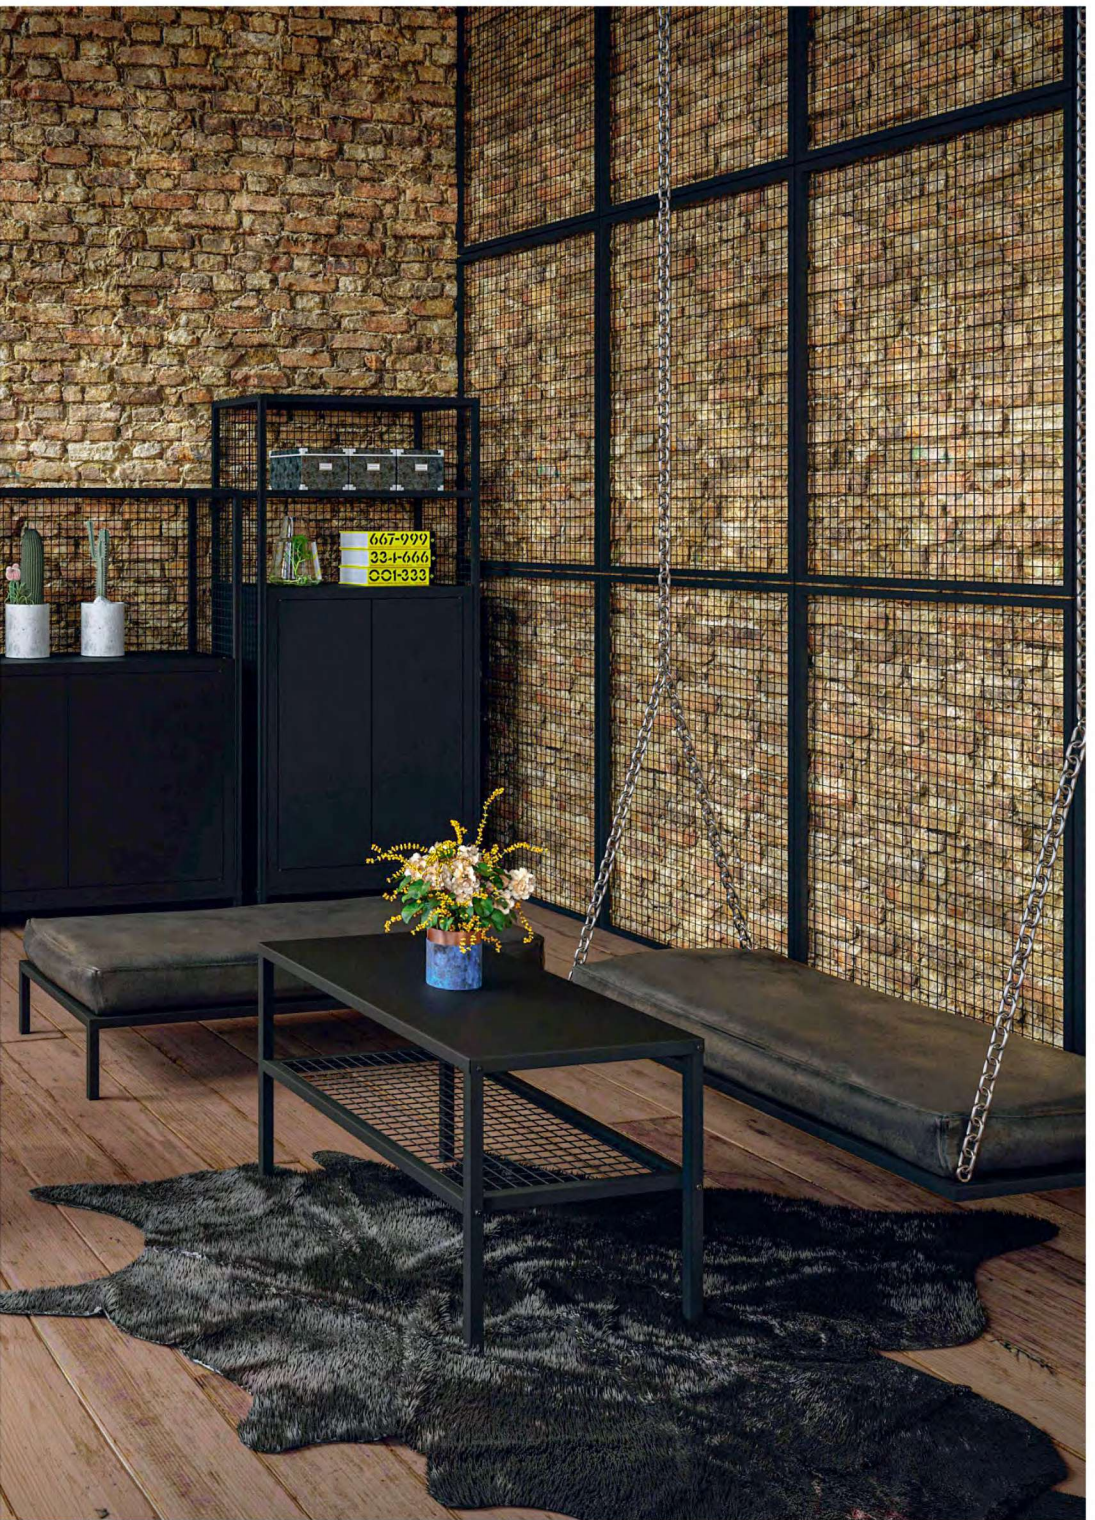

the arrangements were made with the use of works of:

B. Rusin, K.Martens, D.Derksen, R. Modzelewski (VZÓR)
