

Description

The MSW family consists of "heavy" workshop cabinets designed for storing tools and workshop accessories. The MSW heavy workshop cabinets are built to withstand the toughest conditions. They feature a monolithic welded construction, significantly enhancing structural strength. The cabinet body can support up to 700 kg of weight. Due to the welded construction, the cabinets are delivered fully assembled, requiring no installation or assembly.

MSW heavy workshop cabinets are designed for professionals who demand the highest quality and durability. The MSW cabinets with shelves come standard with reinforced galvanized shelves, each with a load capacity of 100 kg. The cabinets have wing doors equipped with a 3-point lock and handle. They are available in two different height options and two different width options, allowing users to select the cabinet that best fits their needs.

A standard palette of 16 RAL colors allows the cabinets to be matched to any interior, and the option to paint the doors in a different color from the body creates up to 256 unique color variants. Before painting, all elements are coated with a zirconium layer to protect against corrosion and increase paint adhesion. The cabinets are manufactured in full compliance with ISO:9001 and ISO:14001 standards. Additionally, they are coated with paint that has a Fire Reaction Classification of A2-s1,d0 issued by the Building Research Institute.

Features

Workshop Cabinets MSW

- 5-year warranty (according to Malow product warranty conditions)
- Intended for dry and ventilated indoor spaces
- Body and doors made of 1 mm sheet metal
- Reinforced galvanized shelves with a load capacity of 100 kg each
- Maximum permissible body load:
 - 400 kg for the low variant
 - 700 kg for the high variant
- Adjustable leveling feet accessible from the inside
- Sliders for easy cabinet movement and floor protection
- Available in 16 RAL colors at no extra charge
- Option to combine 2 colors at no extra charge (doors in a different color than the body)
- Can be anchored to the wall
- Three-point lock with RONIS type closure, handle, and two keys included
- Protected against corrosion with a zirconium coating

MSW cabinets with shelves - Low

Designation	MSW110/5-22	MSW112/5-22
Code	MSW 16030622	MSW 17030622
Dimensions H x W x D	1040 x 1000 x 500 mm	1040 x 1200 x 500 mm
Equipmnet	2 reinforced galvanized shelves	2 reinforced galvanized shelves

MSW cabinets with shelves - high

Designation	MSW210/5-23	MSW212/5-23
Code	MSW 16050623	MSW 17050623
Dimensions H x W x D	1990 x 1000 x 500 mm	1990 x 1200 x 500 mm
Equipmnet	4 reinforced galvanized shelves	4 reinforced galvanized shelves

5-year warranty shows that we are confident in our products due to high quality workmanship and reliability. We want you to feel safe and satisfied with working with us.

ISO certification confirms compliance with standards and the high quality of products and services we offer.

Our products are made from steel sheet coated with polyester or polyester-epoxy paint. They have a Fire Reaction Classification of A2-s1,d0 (according to PN-EN 13501-1:2019-02).

We offer 16 RAL colours as standard. Thanks to this our furniture can be matched to any interior.

We test our products in our own laboratory, the Centre for Research and Development (CBR). This ensures that the tests are comprehensive and carried out correctly.

Zircon technology provides very good corrosion protection for our products. In addition, this process improves paint adhesion.

Description

MSW is a family of heavy workshop cabinets designed for storing tools and workshop accessories. The MSW heavy workshop cabinets are engineered to withstand the toughest conditions and are standardly equipped with galvanized shelves with a load capacity of 100 kg. These cabinets feature a welded monolithic construction, significantly enhancing their structural strength. The cabinet body can withstand a load of up to 700 kg. Due to their welded construction, the cabinets are delivered fully assembled, requiring no installation or assembly.

MSW heavy workshop cabinets are designed for professionals who require the highest quality combined with high durability. The cabinets have hinged doors equipped with a three-point lock and handle. The MSW Tool Cabinets are equipped with galvanized shelves adjustable throughout the entire height of the cabinet, drawers adjustable throughout the entire height, and a 500 mm high tool panel. The doors have special handles on the inside, allowing the installation of an accessory tool panel. Models 210/5-17 and 212/5-17 come standard with a set of tool holders.

The cabinets come in two different height variants and two width variants, allowing everyone to choose a cabinet that suits their needs. The standard palette of 16 RAL colors enables the cabinets to match any interior, and the option to paint the doors in a different color from the body allows for the creation of up to 256 unique color variants. Before painting, all components are coated with a zirconium layer, which protects them from corrosion and increases paint adhesion. The cabinets are manufactured in full compliance with ISO:9001 and ISO:14001 standards. Additionally, they are coated with paint that has a Fire Reaction Classification: A2-s1,d0, issued by the Building Research Institute.

Description

MSW is a family of heavy workshop cabinets designed for storing tools and workshop accessories. The MSW heavy workshop cabinets are engineered to withstand the toughest conditions. They feature a welded monolithic construction, significantly enhancing structural strength. The cabinet body can withstand a load of up to 700 kg. Due to their welded construction, the cabinets are delivered fully assembled, requiring no installation or assembly. MSW heavy workshop cabinets are designed for professionals who require the highest quality and durability.

The MSW cabinets for chemicals come standard with special sealed galvanized shelf trays with drip pans, each with a load capacity of 60 kg. Additionally, these cabinets are equipped with air vents for better ventilation and perforation on the doors. Each cabinet has a GHS-02 label on the doors for standard chemical hazard identification.

The cabinets have hinged doors equipped with a three-point lock and handle. They come in two different height variants and two width variants, allowing everyone to choose a cabinet that suits their needs. The standard palette of 16 RAL colors enables the cabinets to match any interior, and the option to paint the doors in a different color from the body allows for the creation of up to 256 unique color variants.
