

MSWV

MSWV power tool charging cabinets are part of the MSW “heavy” range of heavy-duty workshop cabinets, designed for the storage of tools and workshop accessories. The MSW workshop cabinet family has been developed for professionals who require the highest level of quality and durability. The cabinets feature a monolithic welded construction, which significantly enhances structural strength. The cabinet body is capable of withstanding loads of up to 700 kg. Thanks to the welded design, the cabinets are delivered fully assembled and do not require any installation or bolting. MSW-V cabinets are equipped with a dedicated power strip featuring electrical sockets as well as USB Type A and Type C ports. As standard, MSWV cabinets are fitted with reinforced galvanised shelves, each with a load capacity of 100 kg. The cabinets are fitted with hinged doors equipped with a 3-point locking system and handle. They are available in two height variants and two width variants, allowing users to select a cabinet that best suits their individual needs. A standard palette of 16 RAL colours enables the cabinet to be matched to any interior, while the option to paint the doors in a different colour from the body allows for up to 256 unique colour combinations. Prior to painting, all elements are coated with a zirconium layer, which protects against corrosion and improves paint adhesion. The cabinets are manufactured in full compliance with ISO 9001 and ISO 14001 standards. In addition, they are coated with paint that holds a Reaction to Fire classification A2-s1,d0, issued by the Building Research Institute (Instytut Techniki Budowlanej).

Key Features

- MSWV
- 10-year warranty (in accordance with Malow warranty terms and conditions).
 - Cabinet intended for indoor use in dry and ventilated rooms.
 - Power strip equipped with:
 - 7 × 230 V sockets, 1 × USB-A port, 1 × USB-C port in the wide version
 - 5 × 230 V sockets, 1 × USB-A port, 1 × USB-C port in the narrow version
 - Available in versions with 230 V sockets type E or F
 - Rated power: 3,680 W
 - Maximum USB charging power: 15 W when using one charging port; 7.5 W per port when using both ports
 - USB ports (regardless of cabinet version): 1 × USB-A + 1 × USB-C, 5 V, max. 3 A – 15 W
 - Resettable 16 A circuit breaker
 - Made of 1 mm thick steel sheet
 - Reinforced galvanised shelves with a load capacity of 100 kg
 - Maximum permissible body load:
 - 400 kg in the low version
 - 700 kg in the high version
 - Levelling feet adjustable from the inside
 - Glides facilitating cabinet movement and protecting the floor from scratches
 - Power cable approx. 1.5 m long, terminated with a UNI-SCHUKO plug
 - Three-point locking system with handle and two keys included
 - Perforation on the rear panel enabling ventilation
 - Cabinets made of steel sheet protected by zirconium conversion coating and finished with powder coating
 - Available in 16 RAL colours at no extra charge; two-colour combinations available at no extra charge (doors in a different colour than the body)
 - No possibility of installing additional accessories
 - CE – Conformité Européenne, confirming compliance with European Union regulations on safety, health, and environmental protection

Variant	Type E socket		Type F socket	
Description	<p>The Type E socket, commonly referred to as the “French” socket, is a standard electrical socket used in Poland. It features symmetrical plug holes and a protruding earthing pin located above the socket, ensuring electrical safety. It is compatible with Type C, E and, in many cases, Type F plugs. The socket supports a current of up to 16 A and a voltage of 230 V.</p>		<p>The Type F socket, commonly known as “Schuko”, is a standard socket type used in many European countries. It features symmetrical plug holes and two spring-loaded earthing contacts on the sides, which provide protective earthing. The socket is compatible with Type C, E and F plugs, supports a current of up to 16 A and a voltage of 230 V, and allows the plug to be inserted in either orientation (180° rotation).</p>	

Description of markings

A 10-year warranty is proof of our confidence in our products, resulting from their high manufacturing quality and reliability. We want you to feel secure and fully satisfied with your cooperation with us.

The ISO certificate confirms compliance with applicable standards as well as the high quality of the products and services we offer.

The cabinets are tested in our in-house laboratory – the Research and Development Centre (R&D Centre).

The zirconium conversion coating technology used provides excellent corrosion protection for the cabinets. In addition, this process improves paint adhesion.
